SOX9500—Half Cushion Crew
3 pair pack, 6 pair pack
85% Cotton, 15% Nylon

BREAKDOWN:

Key Objective:
Definitely not your “basic” crew. This sock is cotton rich with cushion on the bottom of the foot—where you need it most. Antimicrobial to prevent odor and a smooth toe seam to reduce irritation. Justin knit-in logo over the toe means they’ll come back for more.

Key Features
1. **Cotton-rich product**: Cotton hand for comfort
2. **Half Cushion Sole**: Foot comfort
3. **Reinforced Heel and Toe**: For durability
4. **Smooth Toe Seam**: Reduces the chance of irritation
SOX9501—Half Cushion Crew
3 pair pack
85% Cotton, 15% Nylon

This traditional boot sock style is upgraded with acrylic yarns that have a moisture movement story. Antimicrobial to help prevent odor. An added Justin heat transfer so they’ll remember their favorite sock!

Key Features

1. **Acrylic blend:** For a soft hand and moisture movement
2. **Full Cushion Comfort:** Plush comfort throughout the sock
3. **Smooth Toe Seam:** Reduces the chance of irritation
SOX9520—Justin Youth Half Cushion Crew
3 pair pack
54% cotton, 33% polyester, 5% olefin, 4% nylon, 4% spandex

BREAKDOWN:

Key Objective:
Super soft cotton feel blended with moisture management fibers. An arch support helps to hug the sock to the foot. The Justin knit-in logo means customers will remember their favorite sock!

Key Features
1. **Cotton-Poly Blend:** Cotton hand for comfort, poly fibers for moisture management
2. **Half Cushion Comfort:** For where you need it most
3. **Arch Support:** For a snug fit around the foot
SOX9603—Justin Super Arch Support Insole

**BREAKDOWN:**

**Key Objective:**
Stability, support and full length cushioning. Anatomically shaped arch support and deep heel cup for support and stability. Anti-microbial treatments on the top cover help protect against odor causing bacteria.

**Key Features**
1. **Support:** Stability insole
2. **Protection:** Anti-blister top cover
3. **Cushion:** Maximum cushioning
**BREAKDOWN:**

**Key Objective:**
Strategically placed gel padding lessens impact and pressure from daily activities. Lightweight cushion from heel to toe with rear and mid foot support. Anti-microbial treatments on the top cover help protect against odor causing bacteria.

**Key Features**

1. **Support:** Heel and ball of foot gel pads
2. **Protection:** Shock absorbing
3. **Performance:** Reduce muscle fatigue
4. **Cushion:** Gel comfort
BREAKDOWN:

Key Objective:
Maximum performance cushioning. Superior cushion for heel and forefoot areas. Airflow channels move warm air out and draws cooler air in. Anti-microbial treatments on the top cover help protect against odor causing bacteria. Anti-friction top cover helps prevent blisters and keeps feet cooler and drier.

Key Features
1. **Support**: Stability insole
2. **Protection**: Anti-blister top cover
3. **Cushion**: Maximum cushioning
SOX9609—Justin Comfort Boot Insole

**BREAKDOWN:**

**Key Objective:**
Provides stability, flexibility, and full-length lightweight cushioning. Long lasting comfort with extra padding in the heel cup.

**Key Features**
1. **Support:** Stability insole
2. **Protection:** Suede tec fabric cover
3. **Cushion:** Extra heel cushioning
BREAKDOWN:

**Key Objective:**
Unparalleled comfort. Polyurethane jel pads in the heel and ball area for added padding on the strike zones. Footbed is cushioned with foam and encapsulated air cells to provide energy return and reduce muscle fatigue. Square toe to fit in square toe boots.

**Key Features**
1. **Support:** Heel and ball of feet jel pads
2. **Protection:** Shock absorbing
3. **Performance:** Reduce muscle fatigue
4. **Cushion:** Jel comfort
